## Configuration Guide

## 8960 Series 10 Wireless Communications Test Set – Mainframe, Applications, and Software

To accelerate the testing of wireless devices throughout design and manufacturing, use the Agilent Technologies 8960 Series 10 wireless communications test set.

The building blocks of the 8960 are an E5515 test set mainframe and mobile test applications (TAs) or lab applications (LAs). Test applications provide RF parametric measurements and base station emulation capabilities for all major 2G/3G/3.5G cellular technologies. Lab applications add a wide range of IP data test capabilities and support real-world testing of today's hot applications such as data throughput, SMS/MMS, AGPS, simultaneous services, and more.

Wireless Test Manager is a family of easy-to-use software which automates parametric measurements and basic call processing tests on the 8960. Wireless Test Manager runs on a Windows PC.

Interactive functional test software automates real-world data application test on the 8960. Interactive functional test software runs on a Windows PC.

This configuration guide describes how to configure a new 8960 test set for single or multiple wireless formats and lists the upgrades available for existing 8960 test sets.

## Configuring a New 8960 for Your Application

Tables 1 and 2 show the recommended or required options to purchase with a new 8960 for testing various wireless formats. Table 1 outlines the various test application configuration options. Table 2 outlines the lab application configurations available. Table 3 lists LA annual contracts. An annual contract provides early LA releases and LA upgrades for the term of the contract.

If adding a TA or LA to an existing E5515C/E mainframe, refer to the section entitled, *Adding wireless technology formats to your 8960 test set.*

## Location Server Emulator Software

### E6965A

The E6965A location server emulator software is a standalone Windows PC-based software application that emulates a network-based location server. The E6965A facilitates testing of location services related hardware and firmware/software in SUPL-enabled terminal (SET) devices that utilize assisted GPS (A-GPS) positioning. Secure user plane location (SUPL) is a technology which utilizes existing cellular infrastructure and standards to transfer location services (LCS) data over a user plane bearer, such as internet protocol (IP). The E6965A with options 1FP and 2FP facilitates A-GPS/location service testing via the user plane by emulating a SUPL location platform. Used in combination with the Agilent 8960 wireless communications test set and an appropriate lab application, the E6965A makes it possible to test a SUPL-enabled terminal on your benchtop. For more information see [www.agilent.com/find/E6965A](http://www.agilent.com/find/E6965A).

## Upgrading an Existing 8960 Test Set

The 8960 is a flexible test set that can be upgraded to meet your changing wireless test needs. There are four types of 8960 upgrades:

1. Updating an existing test/lab application
2. Upgrading an application to a new model number
3. Upgrading a test application to a lab application
4. Adding a wireless technology format

When upgrading applications, an 8960 HW upgrade may need to enable the mainframe to run the new applications or enable the new features. For example, adding the DC-HSDPA application may require that the E5515C HW be updated with E5515CU-80E, E5515CU-58C, -80C, or -80E. Other individual E5515C HW upgrade kits may be required to support specific features or applications for other wireless technologies. Please contact your Agilent Sales Representative for more information.

### 1. Updating a TA or LA revision to get new features

TAs and LAs are periodically revised to add new features, improve performance, or resolve known issues. New features typically require a TA option upgrade, TA revision to current upgrade, LA model upgrade, LA option upgrade, or an E5515 mainframe hardware upgrade. Refer to Table 4 to determine the appropriate TA upgrade. The latest features available for the 8960 are described in the TA release notes at [www.agilent.com/find/8960manuals](http://www.agilent.com/find/8960manuals). To determine if a hardware upgrade may be required to enable a feature, contact your Agilent Sales Representative.

TA and LA downloads are available at [www.agilent.com/find/8960downloads](http://www.agilent.com/find/8960downloads). A valid license is required. Contact your Agilent Sales Representative for application upgrade information.

NOTE: Application suites (E1991, E1993, E1996, E6716, E6717, and E6719) can be updated by upgrading the individual constituent applications. For example, to upgrade the E6701G GSM/GPRS lab application and the E6703F W-CDMA lab application purchased in the E6717D UMTS LA suite, the individual upgrades E6701HU-001 and E6703GU-002 should be purchased. There are no upgrade products for the suites as a whole. Typically using newer 8960 HW requires the latest application revisions, but there are some exceptions. For more information visit [www.agilent.com/find/E5515releasenotes](http://www.agilent.com/find/E5515releasenotes).

## 2. Upgrading an existing application to a new model number

Upgrading a TA or LA to a new model number (e.g. E1985B to E1987A, or E6701F to E6701G) offers important new features and functionality. LA upgrades to newer model numbers are offered as an upgrade product. TA upgrades may be free downloads or upgrade products. TA and LA upgrades are customer-installable. Refer to Table 5 for available TA model upgrades and Table 6 for available LA upgrades. Some TA and LA model upgrades may require an E5515 hardware upgrade to run or enable specific features. Contact your Agilent Sales Representative for specific application upgrade information.

### 3. Upgrading a test application to a lab application

Upgrading a TA to an LA (e.g. E1962B to E6702F) is customer-installed. Some TA to LA upgrades may require an E5515 mainframe hardware upgrade. TA to LA upgrades must be customer installed, they cannot be ordered pre-installed on new instruments. Contact your Agilent Sales Representative for compatibility information.

Table 7. TA to LA upgrades

TA format	Application		Upgrade to order
	From	To	
<b>GSM/GPRS TA to LA</b>	E1968A	E6701J	E6701JU-001 <sup>1</sup>

<b>Fast switching</b>	E1987A	E6785I	Free upgrade <sup>1, 2</sup>

1. The latest LA revisions require E5515E, the latest E5515C (with S/N MY52101001 and above), or E5515C with at least E5515CU-787 or E5515CU-80C. Please contact your Agilent Sales Representative for more information.

2. Download free upgrades at [www.agilent.com/find/8960downloads](http://www.agilent.com/find/8960downloads).

### 4. Adding wireless technology formats to your 8960 test set

You can add any TA or LA to an existing E5515E or E5515C. Being able to purchase another wireless format for your existing E5515 may save considerable expense when compared to purchasing a new test set. Adding a new TA or LA to an existing E5515E or E5515C may require a hardware upgrade. Contact your Agilent Sales Representative for details and delivery information.

**Important:** Existing TA and LAs installed on an E5515E or E5515C may have to be updated to a newer revision or new model after a hardware upgrade. Older LA models may not work on an upgraded E5515. Before ordering an E5515 hardware upgrade, check with your Agilent Sales Representative to make sure you have ordered the necessary LA upgrades to run on the upgraded E5515 hardware.

### 5. Three main hardware upgrade kits for the E5515C

There are three primary E5515C upgrade kits: E5515CU-80E, -80C, and -58C. Each of these kits include a batch of HW modules. Other kits are available for E5515C-specific HW upgrades. Some HW upgrade kits are used to enable the E5515C to operate new 8960 TAs and LAs.

**E5515CU-80E** This HW upgrade kit updates most, but not all, key E5515C modules to be the same as the E5515E in order to support DC-HSDPA. Contact your Agilent Sales Representative for more information or visit [www.agilent.com/find/E5515CU-80E](http://www.agilent.com/find/E5515CU-80E).

**E5515CU-80C** This HW upgrade kit updates most, but not all, E5515C modules to be the same as the E5515C hardware shipped from March 12, 2012. Contact your Agilent Sales Representative for more information or visit [www.agilent.com/find/E5515CU-80C](http://www.agilent.com/find/E5515CU-80C).

**E5515CU-58C** This kit is used to upgrade very old E5515C units to a HW version that is equivalent to the HW release of September 2008. However, not all modules are included. Contact your Agilent Sales Representative for more information or visit [www.agilent.com/find/E5515CU-58C](http://www.agilent.com/find/E5515CU-58C).
